Product/ Income Project Excel Cleaning Process

1. Downloaded Raw data file from US government
2. Imported CSV file to Excel
3. Removed all data I wasn't going to use
    a. This case I was only interested in the data for household income by state
    b. I kept the median and mean data
4. I parsed the data row "Label Grouping" using 'Text to Column' to get the column headers to read "[State]!!Households!!Estimate" to ""[State] Households Estimate"
    a. Highlighted row "Labels" and changed it to Rows using 'Paste Transpose'
        i. Added new, blank column
        ii. Highlighted Row
        iii. Copied
        iv. Paste Transpose
    b. Got rid of the "!!"
        i. 'Data' → 'Text to Colum"
        ii. Ran the 'Text to Column Wizard'
    c. Deleted unnecessary columns
    d. Pasted State names back into rows using 'Paste→ Transpose"
